About UExcelerate:

- **Company Focus:** UExcelerate is a leadership skills-building platform where users from various organizations enhance their leadership abilities by learning from professional coaches.
- **Goal:** Simplify access by developing bots for **Slack** and **Microsoft Teams** to enable seamless interaction without requiring users to log in directly to UExcelerate's platform.

Integration Objective:

- Build a **UExcelerate plug-in** utilizing the company's APIs.
- Integrate these APIs into **Slack** and **Microsoft Teams**.
- Development can leverage:
 - **Microsoft SDK** for Teams bots.
 - **Slack SDK** for Slack bots.

Key Features for Bots:

1. Allow users to connect with a coach directly from Slack/Teams via simple commands.
2. Eliminate the need for repeated logins to UExcelerate for users to perform actions.

Action Items:

1. **Plan API Integration:**
 - Explore and understand the APIs provided by UExcelerate.
 - Identify specific use cases and bot commands for interaction.
2. **Development:**
 - Begin with foundational bot development for Slack and Teams.
 - Focus on **team bots** and **Slack bots** for initial implementation.
3. **Authentication:**
 - Ensure secure access to APIs, avoiding the need for repetitive logins.
