

MOM 4

FEB 4, 2025

Agenda

Progress Review, Authentication,
Azure Setup, MS Teams Copilot

Action Items

Slack Bot Authentication

- Explore authentication using credentials.

MS Teams Copilot Integration

- Explored possibilities of adding Copilot-based AI enhancements.
- Need to check documentation and feasibility.
- Next steps: Research API and integration methods.
- Document Slack Bot and MS Teams Bot functionalities, architecture, and setup

General and Roundtable Updates

1 Demonstration of Slack Bot & MS Teams Bot

- Showcased the initial implementations of both bots. MS Teams Bot: Basic interactions working, API integrations pending.

2

- Once Azure account setup is done, the bot can be added with proper authentication methods.

3 Azure Account Setup for MS Teams Bot

- Discussed the need for Azure setup for bot deployment.
- Required for advanced features & authentication in MS Teams.
- Next step: Get access and configure the bot properly.
